

/ CONVEYOR CHAINS

PROTORQUE®

/ Conveyor Chains

Protorque conveyor chains are a great solution when you need to transport unit loads and bulk goods. The chains are suitable for a variety of standard conveying purposes and can be used in many industries, such as food and beverage, agriculture, and wood industries.

/ With Protorque you will get:

A fit-for-function chain suitable for a broad range of industrial applications and is often used in all different industries like material handling and wood industries.

A wide product range of the most common conveyor chains – if you have a specific wish, just ask and we will find a solution to you.

Strong availability from stock (a few specific chains will not be in stock, but we will make it available for you upon request).

A sustainable supply chain from audited suppliers.

/ Properties

Temperature operating range -20°C to +120°C with standard lubrication

For the most common types of application, standard lubrication can be used on all chains directly out of the box.

Carbon steel side plates gives excellent wear resistance for increased life and decreased maintenance.

Standards ISO 1977 - DIN 8165 – DIN 8167. Meets RoHS and REACH requirements.

/ Conveyor Chains

Type M

Protorque conveyor chains are suitable for larger bulk handling and demanding applications. A cost-effective and reliable chain constructed according to established standard.

Temperature operating range between -10°C to +80 °C with standard lubrication. Carbon steel side plates gives excellent wear resistance for increased life and decreased maintenance. Protorque chains are ISO 1977 - DIN 8165 - DIN 8167 and meet RoHS and REACH requirements.

C2100	63,5	2 1/2"	19,05	19,05	10,9	109	3,6

/ Conveyor Chains

Rubber top roller chains

These chains are available in simplex design sizes 08B-1-16B-1 and duplex design 08B-2 - 10B-2. It's unique profile with vulcanised elastomer makes this chain ideal for applications where fragile goods require gentle conveyor handling.

Technical features:

- Material: Steel
- Straight side plates: No
- Corrosion resistant: No
- Surface treatment: No
- Maintenance free: No

/ Conveyor Chains

Lumber conveyor chains

The Protorque lumber conveyor chains have the perfect design for usage within sawmill industries. We stock an assortment of the most common sizes and executions.

Available in stock are sizes 12B - 32B. Other types of chain are available upon your request.

Technical features:

- Material: Steel
- Corosion resistant: No
- Surface treatment: No
- Maintenance Free: No
- Lubrication: Yes
